PROFESSIONAL SUMMARY

Highly accomplished Software Engineer with over 3 years of experience engineering global-scale mobile systems, payment infrastructures, and secure digital identity frameworks for production platforms like Samsung Wallet. Proven track record of eliminating vendor dependencies by architecting custom SDK-free solutions that drive \$200,000+ in annual corporate savings. Adept at steering cross-functional collaboration across international time zones (US, South Korea, India, and Philippines), blending an agile delivery mindset with a deep commitment to Object-Oriented Programming (OOP) principles, MVVM, scalable system design and clean, maintainable architecture.

TECHNICAL SKILLS

- **Languages:** Kotlin, Java, PHP, JavaScript, Python, HTML, CSS
- **Mobile & Web Engineering:** Android SDK, Android Studio, Jetpack Compose, Laravel, Tailwind, Bootstrap
- **System Design & Databases:** MySQL, MSSQL, Oracle, Firebase, SQLite, RESTful APIs, System Design, Dagger
- **Data & Advanced Technologies:** BLE (Bluetooth Low Energy), NFC, OCR, Google ML Kit, Machine Learning, AI, Automation
- **Tools & Methodologies:** Agile/Scrum, DevOps Practices, CI/CD, Code Reviews, Git, Production Systems, Application Deployment/Rollout, Kanban

WORK EXPERIENCE

Samsung R&D Institute Philippines | Software Engineer

July 2023 – Present | Manila, Philippines

- **Architected and engineered** a custom, high-performance solution that eliminated reliance on a costly third-party vendor SDK, delivering **\$200,000+ in verified annual licensing savings**.
- **Developed and optimized** a secure Digital ID feature for Samsung Wallet, leveraging OCR, BLE, and NFC. **Ensured strict compliance** with international **ISO/IEC identity standards**, establishing secure, interoperable device-to-device verification protocols across distributed production systems.
- **Developed and implemented** an installment payment feature for Samsung Wallet, directly diversifying transactional workflows and enhancing user conversion metrics for millions of active global users.

- **Owned, maintained, and refactored** high-traffic modules within the core Samsung Wallet USA repository (payments, digital ID, and digital promotions), scaling the code for platform runtime stability and fault tolerance.
- **Led cross-functional technical collaboration** with engineering stakeholders, product managers, and architects across India, South Korea, and the United States, streamlining API integrations and maximizing client-server application performance.
- **Conducted rigorous code reviews, debugging, and testing** during critical deployment phases, shipping performance optimization updates during international business trips.

Amdocs | Software Engineer Intern

December 2022 – June 2023 | Manila, Philippines

- **Designed and built** an internal CRM application inventory management system scaling over **500+ integrated enterprise applications**, reducing operational overhead.
- **Developed an analytical administrative dashboard** to aggregate and monitor core organizational KPIs, dramatically increasing internal team efficiency and data visibility.
- **Collaborated across onshore and offshore sprint teams** utilizing Agile and DevOps practices to deliver high-quality backend services and maintain stable system architectures.
- **Owned end-to-end usability and functionality testing**, writing comprehensive test cases to eliminate software regressions and ensure high-fidelity user experiences.

EDUCATION

- **Asia Pacific College** | Bachelor of Science in Computer Engineering
 - *Graduated Magna Cum Laude* (August 2023)

RESEARCH & PUBLICATIONS

- **IEEE Publication:** Author of "*A Convolutional Neural Network-based Approach for Lettuce Leaf Disease Classification*" published at the **2023 IEEE 12th Global Conference on Consumer Electronics**.
- **Enterprise Architecture Project:** Developed high-impact web and mobile utility applications tailored for the Department of Agriculture and East West IESI.
- **IoT System Design:** Architected, prototyped, and programmed an automated Aquaponics monitoring and control ecosystem leveraging Internet of Things (IoT) hardware and automated sensor arrays.

AWARDS

- **Team Member of the Month (April 2026) – Samsung R&D Institute Philippines**
 - **Recognized for driving significant financial efficiency** by architecting a custom solution that completely eliminated external vendor dependencies, saving **\$200,000+ annually** in licensing fees.
 - **Cultivated technical relationships** with global partners during a high-priority U.S. business trip, ensuring alignment by executing on-site debugging and rapid feature iteration.
